Valued Vesta Customer:

Thank you for your continuing business relationship with Vesta. Your business is very important to us, and we are thankful that you trust our team to support your silicone product needs. The current business environment has created new challenges, and continues to require all parties to look for ways to improve their value to their customers. As a leading contract manufacturer, we understand that value includes a fair balance between quality, service, price and business efficiency. With that in mind, we are pleased to inform you that we are again expanding our facility in Franklin, WI. This expansion will nearly double our existing manufacturing space, and will include features such as the Vesta Innovations Center – offering our customers design for manufacturability assistance, dedicated final packaging lines, and enhanced molding, extrusion and assembly areas incorporating lean and cellular concepts. Our expansion project ensures that Vesta can support your business growth requirements for the foreseeable future. Finally, this investment allows us to provide you with a medical device manufacturing platform supporting one of the widest range of silicone product service offerings in the industry.

This expansion is nearing completion. We anticipate occupying the new space by the end of third quarter of this calendar year. Please be assured that formal installation qualifications and operational qualifications will be performed on all equipment used to manufacture product which will be relocated as a result of our expansion, as well as all affected building systems. Also, recalibrations will be performed on all production and inspection equipment that requires calibration.

As an additional reminder, Vesta is proud to have expanded our material options platform earlier this year with the acquisition of Extrumed. Extrumed is an industry leader in precision thermoplastic extrusions, with expertise in tight tolerance and multilumen profile extrusions. Please do not hesitate to contact your sales manager or our Vesta corporate office if you have an interest in learning more about Extrumed's capabilities. You can also learn more about Extrumed on our website at www.extrumed.com.

Please contact your Vesta or Extrumed Sales Manager if you have any questions or require additional information regarding this change. Or, you may contact either of us directly if you wish.

Sincerely,

Robin Piper
Quality Assurance Manager
